

## Video Surveillance

- Video and Sound recording
- Up to 12 Megapixel resolution<sup>3</sup>
- Mechanical day / night shutter
- Ethernet powered (PoE+)<sup>2</sup>
- Up to 20 meter IR range<sup>4</sup>
- Smart IR for good image control<sup>4</sup>
- IP66 waterproof & IK10 rated<sup>5</sup>
- EN50155 rated for vehicle use
- Interior recessed mounting<sup>6</sup>
- Digital privacy masking

1 Minimum of CAT5e and above

2 Requires 802.3at compliant network switch

3 360° and high resolution cameras

4 Infra-Red equipped cameras

5 Exterior cameras

6 Discrete & 360° panoramic, not available with IR

7 Not supplied with storage modules, see list below

8 2 year manufactures warranty

9 3 year manufactures warranty

10 kit of 2 cameras, dome, 360° or both

11 Infra-Red range of 10 meter (over 32 feet)

12 Infra-Red range of 20 meter (over 65 feet)

## Remove the guesswork from “who did it”

Knowing how damage has happened or when property was removed, is an important part of finding the responsible parties. Most existing video surveillance systems are difficult to expand and have cameras that are inadequate in picture quality, especially during night, when most of the incidents take place.

Our system uses standard Ethernet via Category 5e<sup>1</sup> cable for both video and power<sup>2</sup>, recording units ranging from 8 to 32 cameras and almost any custom configurations beyond, makes this ideal for small, medium and enterprise businesses. Free console, desktop based software (Windows) and mobile device app (Android and Apple iOS) to allow viewing live video and playback of recorded footage makes the system highly versatile. The world pioneer of 360° panoramic viewing area and electronic “zone” views results in no more hiding places.

We offer both interior and exterior cameras recording both video and sound, making selection a breeze. Exterior cameras are waterproof (IP66), vandal resistant (IK10) & offer built in infra-red (IR) lighting with operating temperatures down to -40°C (-40°F), meaning they are designed to cater for the Canadian climate. If existing cameras are still needed then they can be integrated via a special adapter.

Other features include: “smart” image processing - resulting in no dark or “white out” areas; digital monitored zones with pre and post recording - when movement is detected you can see what happened before and after an incident. We offer many specialty cameras including: environmental vibration - rated for use in vehicle's (EN50155), long reach (over 100 meters), discrete, covert and license plate recognition.

## Video Surveillance

8 Camera (8Tb ~ 2 modules)

16 Camera (24Tb ~ 4 modules)

32 Camera (24Tb ~ 4 modules)

### NVR Storage units

Dome with IR

360° (Panoramic) Recessed

360° (Panoramic)

360° (Panoramic) with IR

### Internal Cameras

Dome with IR

Bullet with IR

360° (Panoramic)

360° (Panoramic) with IR

### External Cameras

Prison & Extreme conditions  
*water & vandal proof with IR*

Mobile Vehicle  
*water, vandal & vibration proof*

Long Distance (over 100 meters)  
*water & vandal proof with IR*

License Plate recognition  
*water & vandal proof with auto detection*

### Specialty Cameras

Discrete Dome & 360° kit  
*includes microphone*

Covert Wide & 360°

IR Illuminator - 180°  
*40 meters : Water proof*

Desktop controller  
*usb connection*

### Specialty Options

Door Access Control with Camera, RFID reader & full colour printed RFID cards
